

CCS: GARAGE EQUIPMENT SPECIALISTS

Safety-led innovation in garage equipment

SALES@CCS-GE.CO.UK
01942 260666

Service excellence since 1992

For over 25 years, CCS has been at the forefront of garage equipment installation, calibration, testing and maintenance services in the UK and Ireland.

With long-term customer relationships, close attention to detail & an approach that always aims to exceed expectations, our team cares deeply about service excellence & thrives on positive feedback.

From fully-managed installation projects to on-time statutory inspections, planned maintenance and fast repair response times, our industry-leading, forward-thinking and innovative teams keep light automotive and commercial vehicle workshops operational, compliant and safe.

"CCS has worked with our teams in the UK for many years, providing an outstanding level of service. Installations of new garage equipment are completed professionally and with exceptional attention to detail. CCS schedules its engineers to manage our tool calibration, LOLER and PUWER examinations and other necessary safety inspections regularly, and being able to access reporting online is extremely helpful to our operations."

Biffa plc

CCS' unique approach to garage equipment solutions

01. COMPLETE GARAGE SOLUTIONS

From design, project management and installation of new equipment, to proactive maintenance, testing, examination and trusted calibration.

03. INDUSTRY-LEADING KNOWLEDGE

Regulatory health and safety understanding that's unique in the industry, delivering best-practice, compliance-based advice.

05. CUSTOMER-FOCUSED TEAM

A passionate team that cares about its customers and is driven by positive outcomes, building long-term relationships.

02. INNOVATIVE & FORWARD-THINKING

A skilled team which creates bespoke garage equipment solutions for specialist sectors, utilising the latest technologies.

04. ATTENTION TO DETAIL

Meticulous planning of installation projects and care in our work ensures exceptional results and excellent feedback.

06. CREDIBLE & RELIABLE

We deliver what we set out to achieve, from the most complex installation to on-time inspection and maintenance.

Expert garage equipment training

We understand the importance of making an investment in people and equipment. Allowing you to deliver a better service to your own customers, it's essential your teams are fully trained in the safe handling and operation of your garage equipment, helping you to get the most out of your workshop.

Either at our dedicated training facility or on site with your team, your people will access specialist, expert training in the safe use of garage equipment by CCS' senior engineers.

Backed by our leading industry know-how, training sessions by CCS are tailored to your organisation and offer practical, hands-on help, advice and guidance.

CCS training services include:

- ✓ Safe use of vehicle lifts and lifting equipment
- ✓ Carrying out daily checks & in-house equipment safety inspections
- ✓ Undertaking and scheduling basic equipment maintenance
- ✓ Supply of on site training videos at your premises or using our own facility

Advisory services

With professional experience and an approach led by close attention to detail, regulator advisory services by CCS will help to protect your business and your personnel.

Navigating the regulatory landscape can be daunting, presenting real risks to your business in the event of non-compliance. CCS delivers reassuring, practical advice and recommendations supported by our in-depth knowledge and understanding of industry regulations to help keep your people safe and your business compliant.

Our services

Installation

Innovative, specialist & fully-managed garage equipment installations

DESIGN

Bespoke workshop designs are centred on how you want your facility to operate, tailored to the needs of your brand. CCS' in-house engineer team works collaboratively with architects and builders, creating turnkey solutions ready for operation.

With expertise in designing installations for all sectors, from high-end, luxury brand names to large commercial vehicle workshops, our specialist team fully-manages your project from start to finish.

INSTALLATION

Installation projects are project-managed by our UK and Ireland-wide team. Utilising industry-leading equipment, CCS takes care of every aspect of your installation, with pipework, plumbing and other trades delivered by experienced, in-house engineers.

Following commission, CCS trains your personnel on site or at our own in-house training facility in the safe operation, handling and maintenance of your new equipment.

SUPPLY

Partnered with leading names including Nussbaum, Stertil Koni and Dura, garage equipment from CCS is backed by our team's experienced recommendations and unmatched knowledge. Strong supplier relationships ensure you receive best-value solutions.

From complete workshop equipment solutions, installation and commissioning to the supply of smaller garage essentials and tooling, CCS is your trusted workshop partner in the UK and Ireland.

Calibration, Inspection & Testing

Reliable statutory, calibration & inspection solutions for your garage

LOLER INSPECTIONS

On site and on time inspections carried out by skilled engineers to statutory requirements, both on vehicle lifting equipment and to lorry-mounted lifting equipment.

POWER INSPECTIONS

Regular examinations of equipment from vehicle lifts and heavy plant to tooling and machinery, undertaken by experienced engineers on site to minimise disruption.

TOOL CALIBRATION

Fully-accredited calibration for a range of industries, carried out on site annually or as required, meeting quality assurance standards to ensure accuracy and quality of output.

HAND-ARM VIBRATION TESTING

On site and on time inspections carried out by skilled engineers to statutory requirements, both on vehicle lifting equipment and to lorry-mounted lifting equipment.

PAT & PRESSURE TESTING

On site and on time inspections carried out by skilled engineers to statutory requirements, both on vehicle lifting equipment and to lorry-mounted lifting equipment.

CONSULTANCY

Practical consultancy and guidance in health and safety regulations, examinations and testing which helps workshops to operate safer working environments.

Maintenance

Maintenance & repair solutions to keep your garage operational

PLANNED MAINTENANCE

Clients enjoy excellent uptime rates through our regular schedule of planned equipment maintenance.

Caring for equipment including vehicle lifts, compressors, air line and lubrication systems, brake testers, MOT bays, ATFs and ATLs, CCS delivers reassurance that asset databases and investments are managed all year round.

EMERGENCY REPAIRS & MAINTENANCE

Reactive and emergency maintenance and repair of equipment that returns your equipment to use as quickly and safely as possible.

Our large engineer team operates throughout the UK and Ireland, undergoing regular training to ensure we're equipped with the skills needed to support your business and supported by area managers who manage jobs closely.

"The personal approach by the team meant that our workshop's design both met and exceeded our initial brief, with reliable and quality equipment and expert, helpful advice. The installation, testing and commissioning of the workshop was handled professionally, allowing us to bring the facility into use straight away."
